

Webtechnology

Our projet is about a website for people to buy some daily living equipments online.Such as clothes,make-up products,electronic products,books,furniture.It’ s like the website “amazon” while simplified.First, it shows us the homepage.Structure is shown in the picture below.

Its function are registering,logging in,searching,adding to the panier and viewing the panier.Thus, its database should be like this.There are three tables.One is for user,it has uesrID,username,password,address. The second one is for command,it has commandID, date,address,quantite,userID.The last one is for article.It has articleID,couleur,prix and commandID.
